

AMENDMENT TO THE SPECIFICATION

IN THE SPECIFICATION:

Please amend the paragraph extending from line 19 to line 24 of page 1 as follows:

Generally, a nursing bottle is a means for ~~supply~~ supplying the nutrition which is needed for ~~a growing up~~ a baby instead of the mother's milk. Since the nursing bottle is used for a baby who has a low immunity, the nursing bottle should be sanitarily used and the nursing bottle should be often washed or sterilized.

Please amend the paragraph extending from line 28 on page 3 to line 8 of page 4 as follows:

Therefore, the present invention replaces the material of a support member to which a silicon washing brush of an excellent durability which a soft and resilient material and increases the number of installing parts. In the normal state, the support ~~members~~ member remains concentrated. In the state in which a nursing bottle is inserted, the support members are unfolded so as to have a shape identical to the inner peripheral surface of the nursing bottle. The structure of the washing brush is simplified so as to rotate through an opening cap of the nursing bottle. The time for one rotation is shortened, the interior of the nursing bottle is easily washed uniformly. Therefore, the reliability of the washing brush is guaranteed.
